Allowance of Application # 10/665,980

1. The following communication is in response to applicant's amendment received 10-February-2006.

Reasons for Allowance

2. The following is an Examiner's Statement of Reasons for the indication of allowable subject matter. The instant application is directed to a non-obvious improvement over the information described in the related prior art, particularly the article authored by Middlebrooks, entitled *Optimal Model-Predictive Control of Overlay Lithography Implemented in a ASIC Fab*, the improvement comprising a system and method for controlling a registration overlay in semiconductor processing, wherein moving horizon estimation is used to estimate a state, and an input of the registration overlay using the state is determined and applied. This patentable distinction is included in each of the independent claims, nos. 1, 29 and 30. The art of record, either individually or in combination, fails to teach, suggest, or render obvious the useful, concrete and tangible <control of a registration overlay in semiconductor processing> having the corresponding structure which is disclosed in the specification and equivalents thereof at least at page 4, line 2 through page 11, line 6, and Figures 1-5. In view of the foregoing, the claims of the present application are found to be patentable over the prior art.

Response Guidelines

3. Any comments considered necessary by applicant **MUST** be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the
